Art Unit: 3627

Applicant's amendment filed 7/14/05 will necessitate a new grounds of rejection requiring a new base reference to be applied. In order to reduce the burden on the Examiner in reformulating the new rejection in response to these amendments, the following election is required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

species drawn to subset id with locating feature as defined in claims

12,13/22/23;

species drawn to subset id with custom browse/copy feature as defined in claims

12,18,20/22,28,30;

species drawn to subset id with custom browse/formatting feature as defined in claims 12,18,19/22,28,29;

species drawn to subset id with translating search rule feature as defined in claims 12,14,15/22,24,25;

species drawn to subset id with catalog feature as defined in claims

12,16,17/22,26,27;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 11/21 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 3627

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
